## **INSTALLATION**

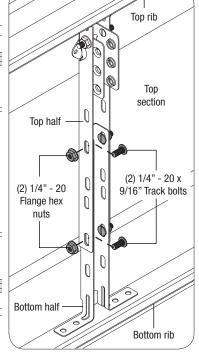

NOTE: For Door Models: 9100, 9405, 9600, 5120, 5145 and 6100.

NOTE: If a u-bar was supplied for the top section, install the u-bar prior installing the adjustable operator bracket.

#### 1 **Installing Adjustable Operator Bracket IMPORTANT!** WHEN CONNECTING A TROLLEY TYPE GARAGE Tools Needed: DOOR OPENER TO THIS DOOR, A WAYNE-DALTON OPENER/ Power Drill TROLLEY BRACKET MUST BE SECURELY ATTACHED TO THE TOP SECTION OF THE DOOR, ALONG WITH ANY U-BARS PROVIDED 7/16" Socket Driver WITH THE DOOR. THE INSTALLATION OF THE OPENER MUST BE 7/16" Wrench ACCORDING TO MANUFACTURER'S INSTRUCTIONS AND FORCE Flat Head SETTINGS MUST BE ADJUSTED PROPERLY. Screwdriver Position the trolley arm hookup inside the top portion of the top Step ladder halve and flush against the back of the top halve. Adjust the top **Tape Measure** holes in the trolley arm hookup with the two upper holes in the top halve. Pencil Fasten both the trolley arm hookup and top halve together with (2) 1/4" - 20 x 9/16" track bolts and (2) 1/4" - 20 flange hex nuts. Place the bottom halve inside the top halve and flush against the inside of the top section. Adjust the both the top and bottom halves out against the top and bottom rib of top section. Loosely fasten both halves together with (4) 1/4" - 20 x 9/16" track bolts and (4) 1/4" - 20 flange hex nuts. **NOTE:** Install the 1/4" - 20 x 9/16" track bolts and the 1/4" - 20 flange hex nuts as far apart as possible, when positioning the top and bottom halves together. NOTE: For retro fit applications, the adjustable operator bracket must be aligned with an existing operator. Now, locate the center of the top section and align the center of the holes in the adjustable operator bracket assembly with the top section center line. Align the adjustable operator bracket assembly vertically.
